Jalla Lakshmi Naga Venkata Surya Likitha

Linkedin: www.linkedin.com/in/jalla-likitha **Email:** jallalikitha17@gmail.com
Github: https://github.com/likithjalla/ **Mobile:** +91-7569685319

Skills

- **Languages**: C++, C, Python
- **Frameworks**: HTML, Java script and CSS
- **Tools/Platforms**: Excel, Power BI, Tableau
- **CS Fundamentals**: DBMS, OS, CN, SQL, OOPs
- **Soft Skills**: Quick Learner, Team management, Adaptable, Project Management

Projects

Airline delay analysis: | GitHub Dec' 25

- Developed an interactive flight delay analytics dashboard to evaluate departure delay trends across time and geography.
- Applied Power Query for data cleansing and transformation, and developed DAX measures for KPIs including average delay, on-time rate, and delayed flight counts.
- Designed interactive dashboards using maps, trend analysis, scatter plots, and combo charts to uncover operational bottlenecks
- **Tech**: Power BI Desktop, DAX, Power Query, Data Modelling, Data Visualization.

Food delivery optimizer using Dijkstra's algorithm | GitHub Sep' 25

- Implemented Dijkstra's Algorithm on a weighted road network to compute the shortest and most efficient delivery paths.
- Incorporated real-world constraints such as delivery time windows, vehicle capacity, and traffic conditions for realistic routing.
- Improved operational efficiency by enabling faster and more reliable delivery planning.
- **Tech**: HTML, CSS, JavaScript

Student Dashboard | GitHub Mar' 25

- Build a structured dataset by integrating multiple student information sources using Python.
- Conducted detailed analysis of academic performance indicators to identify patterns, trends, and correlations that reveal students' strengths, weaknesses, and interest areas.
- Ensured the dashboard was user-friendly, accessible, and structured to support continuous updates and data scalability for future cohorts**.**
- **Tech**: Python (data cleaning, integration, trend analysis), Excel (EDA, reporting, Dashboard design

Training

Lovely Professional University: DSA with C++ Jul' 25

- Gained hands-on experience in core C++ programming, data structures and algorithms, problem-solving techniques, and efficient coding practices to build scalable applications
- Acquired hands-on experience with Git and GitHub, including version control fundamentals, branching and merging workflows, repository management for project management
- Solved real-world programming challenges by implementing optimized algorithms, improving time and space complexity.

Certificates

- Master Generative AI & Generative AI tools (ChatGPT & more) | Udemy | **Link** Sep' 25
- Computational Theory: Language Principle & Finite Automata Theory| Coursera | **Link** Sep' 25
- Build Generative AI Apps and Solutions with No-Code Tools | Coursera | **Link** Aug' 25
- Data structures and Algorithms with C++ Linear Programming | LPU | **Link** Jun' 25

Achievements

Secured 3rd Rank: Jun' 24

- Participated and ranked 3rd in Codewars

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 6.09*** *Aug' 23 - Present*
- **SASI Educational institute** Tadepalligudem, Andhra Pradesh
  Intermediate; ***Percentage: 86.5%*** *Sep' 21- Mar' 23*
- **SASI Educational institute** Tadepalligudem, Andhra Pradesh
  Matriculation; ***Percentage: 95%*** *Apr' 20 – Mar' 21*
